Iconic design and engineering classics

Lotus Esprit Turbo, 1986

The first James Bond car not to wear Aston Martin badges, the Esprit enjoyed a production run of over 25 years and became one of the company's most successful models. The striking wedge-shaped profile of the mid-engined Esprit S1 was the work of Giorgetto Giugiaro back in 1976, and although softened slightly for the S3 in 1981 that profile remained virtually unchanged until in-house designer Peter Stephens' makeover in 1987, the facelifted look lasting until Esprit production ended in 2004.

Lamborghini Urraco 3000, 1976

The Bertone-styled Urraco (the name meaning 'little bull') was announced in 1970, with deliveries commencing in 1972. It was a relatively small Lamborghini, intended to compete with rivals such as Ferrari's Dino 308 and Porsche's 911. The Urraco adopted the Miura's basic mechanical layout, but in place of the Miura's transversely mounted 4.0-litre V12 there was a 2.5-litre V8 that, despite its simpler specification, still produced a highly respectable 220bhp at 7,500rpm.

Aston Martin V8 Vantage Le Mans V600, 1999

The V8 Vantage Le Mans V600 was a remarkable blend of luxury and brutish power. Limited to 40 examples, its exclusivity added to its appeal. The rear-wheel drive V600 was powered by a monstrous, hand-built 5.3-litre V8 engine producing 600bhp. This unsurprisingly created some impressive performance figures, with a 0-60mph time of just 3.9 seconds and a top speed of 200mph. The Le Mans V600 also featured an opulent interior and aerodynamic enhancements to aid stability.

Porsche 959, 1988

The 959 was a startling demonstration of Porsche engineering. Based on the 911, it featured electronically adjustable suspension and four-wheel drive with computers governing the torque sent to each axle. Produced during the supercar boom of the late 1980s, all 200 were snapped up in no time, often changing hands at well over list price. Although unquestionably a masterpiece of technical sophistication, the 959 somehow lacked the glamour of its Italian contemporaries.

Ford Mustang, 1966

Based on the Falcon saloon, the Mustang was introduced in 1964 and was initially available in notchback form only, as shown here. 1965 saw the addition of the popular fastback body style and introduced a wider range of engines, from the basic 2.8-litre straight-6 all the way up to a 4.8-litre, or 289ci, Windsor HiPo V8, making 306bhp and enabling a 0-60mph time of 6.5 seconds. Ford only expected to sell 100,000 Mustangs in their first year, but it took just 18 months to exceed a million.

Ferrari 328 GTS, 1989

Ten years after Ferrari launched the 308 GTB at the Paris Show, the company gave the model a facelift and performance boost in the shape of the 328 GTB and 328 GTS. The two-seater, mid-engine Coupé and Targa also received minor exterior revisions. In particular, the grille was brought forward to flatten the car's nose and the bumpers became body-coloured, but the 328 retained the distinctive side ducts and covered headlights that helped to make the 308 a true icon.

Maserati Bora, 1972

The elegant, Giugiaro-designed Bora was Maserati's first mid-engined car and their answer to Lamborghini's legendary Miura. The Bora was powered by a 4.7-litre V8 engine producing 310bhp and had a similar 170mph top speed to the Miura. However, the Maserati took a clear lead in terms of overall package by virtue of its unrivalled levels of luxury and comfort, with a five-speed ZF manual gearbox, advanced suspension and a spacious, well-equipped cabin.

Bugatti Type 57C Stelvio Cabriolet, 1938

The Type 57 was produced from March 1934 until the outbreak of WW2, with a total of over 700 built. Heavily influenced by Ettore Bugatti's talented young son Jean, the car was larger and far more refined than all the company's previous base models and was new in almost every respect. Three complete body styles were produced at the factory from 1934, all named after famous Alpine peaks, together with a chassis-only version for the leading coachbuilders of the day.

Jaguar XJ220, 1994

The XJ220 was the product of 'The Saturday Club', a group of Jaguar engineers led by Jim Randle. They dreamt up the idea of a 220mph supercar, working on the concept in their spare time. Jaguar soon took the idea on board to showcase their commitment to pushing boundaries and the prototype was shown at the 1988 NEC Motor Show. The maximum speed recorded by the 542bhp XJ220 was 217mph so not quite the full 220, but it was still the world's fastest production car from 1992 to 1994.

Datsun 240Z, 1972

The Datsun 240Z is an iconic sports car celebrated for its distinctive blend of style and performance. Powered by a 2.4-litre inline-6 engine generating 151bhp, it delivered thrilling acceleration and a dynamic driving experience. The rear-wheel-drive setup, coupled with a four-speed manual transmission, enabled a 0-60mph sprint in 8 seconds. The 240Z's sleek appearance and timeless design, characterised by its long bonnet and elegant fastback profile, contributes to its enduring appeal.

BMW M1, 1980

BMW only built 453 of the striking Giugiaro-designed M1 cars, pooling talent from Lamborghini for suspension, Itai Design for the body and Bauer for mechanical components, before final assembly by BMW Motorsport, with 54 cars destined for the racetrack. The M1 was the first BMW to carry the famous M badge and was powered by a mid-mounted, fuel-injected, 3.5-litre engine, producing 277bhp and a top speed of 165mph.

McLaren F1, 1994

The McLaren F1 was a money-no-object attempt to build the ultimate roadgoing supercar, as close to the performance and technology of Formula One as contemporary engineering could make it. Designed by Gordon Murray and utilising a 6,064cc, V12 BMW engine, the result was the first million-dollar car and the fastest production car in the world, with a maximum speed of just over 240mph. The three-seater layout, with the driver's seat centred, further enhanced the driving experience.
